

Over 50 years

The longest established cleanroom company in the UK

BASSAIRE

IS CLEAN AIR

Case Study: Weston Medical

Sterile filling line

This sterile facility was designed to provide laminar flow protection over an automated assembly and aseptic filling line. It comprised stainless steel modules supported over the filling machines with stainless steel cladding to the ceiling, with all manufacturing work being carried out in-house.

The design, manufacture and installation was completed successfully by Bassaire within twelve weeks.

Bassaire staff were involved with all aspects of the entire project from concept to completion, with designers travelling to Germany to inspect the assembly and filling machines prior to commencing with the final design work.

Other products and services

Bassaire has over fifty years experience in the design, manufacture, installation and maintenance of cleanrooms and clean air products.
